

Investing in Women Changing the World

TIRZAH
INTERNATIONAL

In Tanzania, a group of mentees and mentors recently shared their testimony's about going through Tirzah's Emerging Leader Program (ELP). One of the testimony's that stood out was Hope's.

Like many girls, Hope never considered herself a leader until coming into contact with Tirzah. In her testimony she shares,

"I knew I had influence but never considered myself as a leader, with Tirzah, I am now confident that I am a leader."

The ELP is a vigorous course that introduces the women to leadership from God's perspective. Hope writes, "I am in love with the modules and how they make me engage with the ink. It makes me search through myself and compare myself not with anyone in this world but with CHRIST who is the center of all our discussions."

Through this program, the women are paired with mentors who pour into their lives, really demonstrating what it is like to be a servant leader. In her testimony, Hope mentions the bond that exists with her new group of ELP friends. They laugh together and encourage each other while also speaking into each others lives. **"The mentors prune us to be the best versions of ourselves"**.

Hope also shared some of the lessons from the Emerging Leader Program that stood out to her the most, the biggest being that volatile, uncertain times inevitably come, but what matters is keeping your mind on Jesus Christ.

This is just one of many examples of the lives changed by Tirzah's Emerging Leader Program, which empowers women to RISE as Christ-Like leaders in their own communities. Each story like Hope's fuels our commitment to continue investing in these women worldwide!
